

DXLog

FRIEND Files Instructions

File name MWA_Friend.xdt

Download file to your DXLOG data file folder, \Documents\DXLOG.

Make sure the file downloaded okay by viewing the file with Notepad.

The first few lines of the file with the club flag should look like this:

```
# TITLE MWA Members - REV 2023-08-31
AA0AW AA0AW DOUG MN STL MWA NORTH
AA0MN AA0MN MN RAM CLUB NORTH
```

This file only displays information in the Extra Data Window. For MWA it displays the name and some additional data. This file does not prefill exchange information as that is in a different database file

Follow these instructions to use the MWA_Friend file:

1. Save file in C:\Documents\DXLOG
2. On the Menu bar go to – **WINDOWS...** click on Extra Information, about ½ way down
3. Right click in the pop up window select **Extra Data Files**.
4. If the MWA_Friend.xdt is not listed, select ADD and add it to the list.
5. Click OK

The screenshot displays the DXLog interface with three windows open:

- Summary - AC0W**: A table showing QSO statistics for various bands.
- Extra information K0AD**: A window showing the title 'MWA Members - REV 2023-08-31' and a list of call signs.
- Rate**: A window showing performance metrics for 'All bands - All modes'.

The main log window shows the following data:

QSO	Band	Time	Call sign	Name	SPD	Pts	Mult
1	160	22:11	K0MD	SCOTT	MN	1	MN

At the bottom, a status bar displays: 01:28:24 AC0W SR 1135z SS 0047z RUN
